

Emptech's VOIE Services

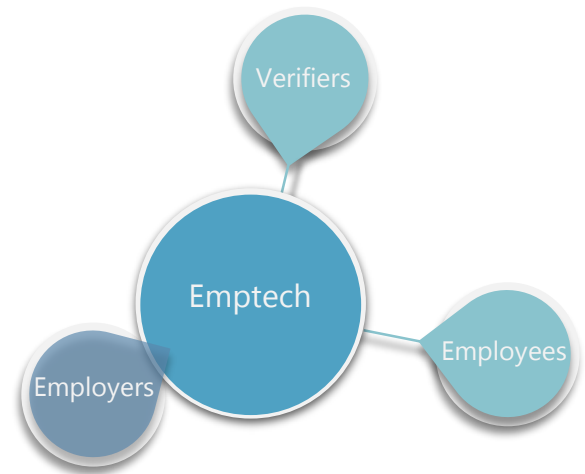

Verification of Income & Employment Management Solution

The Truth About Employment Verifications

Focusing on your business needs is vital to your continued success but often employers are pulled away from that focus to administer employee driven needs, such as verifying employment and/or income. Requests from banks, creditors, landlords, social services are received as a result of employees applying for loans, government programs, etc., and facilitating these requests for your staff is essential. However providing this service to your employees requires labor on your part, and with recent legislation requiring that each request be vetted to ensure your employee's data is protected, you now face increased risk of liability. As a result many employers have turned to other third party entities as a solution, only to struggle with inflexible data file formats, limited account access and poor turnaround times.

Emptech's Verification technology platform, Verifyfast offers a solution to issues that have long plagued the industry and is quickly becoming the preferred verification solution for employers.

Safe, Secure, Reliable

Emptech's technology solution provides your employees with secure, timely and reliable verifications, while ensuring that all information disclosures comply with the Fair Credit Reporting Act (FCRA) and all applicable state and Federal laws. Designed for ease of use, Emptech's verification solution manages all employer/customer verification of income and wage needs for all private as well as governmental social services verifications.

Employer Access

Verifyfast provides you complete transparency and access; view all employee verification requests and the identity of the requesting parties in real-time. Search to view any individual, or utilize our 24/7 reports for company-wide transactions. Access your yearly allotment of employer generated verifications at no cost to you. We understand that circumstances can arise that place you in a position in which a verification is required immediately. With access and transparency you can be in control without the cost or liability.

Employee Access

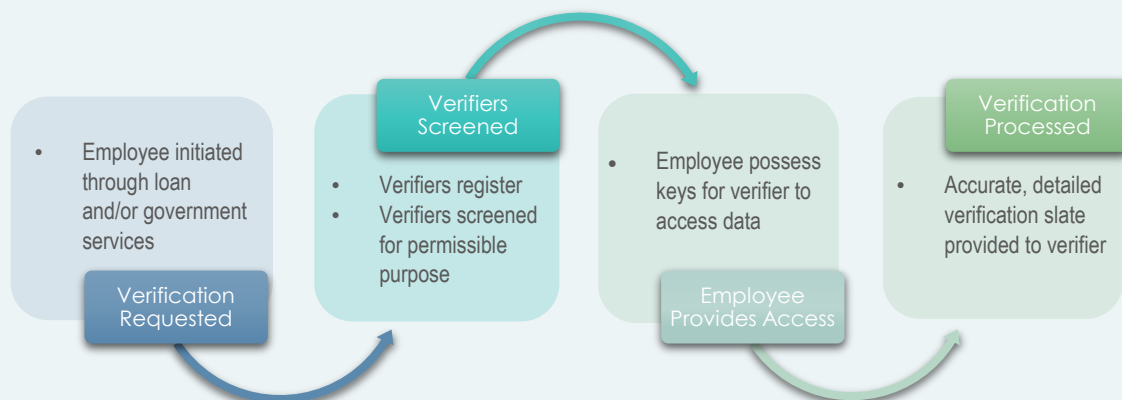

Verifyfast provides your employees with the same transparency and access to their own individual accounts. Each employee can manage their account and view verification requests, review data submitted on their behalf, as well as access one free annual employee generated verification at no cost. Our goal is to provide you with a service that facilitates all your employees' verification needs securely and with ease.

Customized Data Solution

Each employer is unique and so are their pay structures. With this in mind, we know that working closely with clients to build a customized VOIE solution that seamlessly integrates into existing systems and processes is crucial to providing a meaningful solution. This investment into mapping the nuances of your data prevents verification requests from coming back onto your desk while maintaining data integrity. We offer, with confidence, a real solution that provides streamlined verifications that meaningfully minimize the use of your HR and payroll resources while providing support and timely processing of employee verification requests.

Why Use Emptech As Your Third Party Furnisher?

As a furnisher of your data Verifyfast does not sell employer or employee level information to resellers for the purposes of credit checks or to find the whereabouts of individuals. We simply verify one to one only employees that we are directly contracted with through our client.

Ensured FCRA Compliancy

The Fair Credit Reporting Act (FCRA) requires that all verifying entities have “permissible purpose”, the right to request personnel data for individuals they are seeking to verify. Our thorough screening processes filter out and prevent verifiers without “permissible purpose” from obtaining an account with Verifyfast. Enjoy the peace of mind that comes from knowing all verifications processed on your behalf are FCRA compliant.
